Abstract:

Climate change is described as the biggest global health threat of the 21st century -- indeed, it jeopardises our very survival on this planet. Doctors and other health professionals in OraTaiao: New Zealand Climate & Health are urging action to prevent runaway climate change, before it is too late. We are asking all doctors and other health professionals to take action and to do what they can to spread the message. We must mobilise a popular groundswell to prevent the catastrophic consequences to health from this global crisis.

Resource Description

Communication:

resource focus on research or methods on how to communicate or frame issues on climate change; surveys of attitudes, knowledge, beliefs about climate change

A focus of content

Communication Audience:

audience to whom the resource is directed

Health Professional, Policymaker, Public

Exposure :

weather or climate related pathway by which climate change affects health

Unspecified Exposure

Geographic Feature:

resource focuses on specific type of geography

None or Unspecified

Geographic Location:

resource focuses on specific location

Non-United States

Climate Change and Human Health Literature Portal

Non-United States: Australasia

Health Impact: 

specification of health effect or disease related to climate change exposure

General Health Impact

Medical Community Engagement: 

resource focus on how the medical community discusses or acts to address health impacts of climate change

A focus of content

Mitigation/Adaptation: 

mitigation or adaptation strategy is a focus of resource

Mitigation

Resource Type: 

format or standard characteristic of resource

Policy/Opinion

Timescale: 

time period studied

Time Scale Unspecified
